## EDUCATION

Bachelor of Engineering | ECE |  
2016 – 2020 | 7.88 CGPA  
Oriental College of Technology, Bhopal

## IT SKILLS

- JavaScript (Es6), React.js, Redux, TypeScript
- HTML, CSS3, Responsive design
- Java, Spring Boot
- .NET, C#
- SQL Server,
- GitHub/Gitlab Debugging Tools
- Postman

## CORE COMPETENCIES

- User Experience Design
- React.js Development
- System Architecture
- Performance Optimization
- Full-Stack Web Development
- REST API & MVC Architecture
- Agile Methodology and Scrum
- Troubleshooting and Debugging

## CERTIFICATIONS

Frontend Developer (React) by HackerRank

Java Fundamentals by Code with Mosh

## PERSONAL DETAILS

Date of Birth: 01-Apr-1998

Languages known: English, Hindi

# SUCHITA SONI

Software Engineer

## ABOUT

**Passionate and innovative Software Developer** with a focus on creating high quality software solutions and optimizing system performance. Seeking opportunities to **leverage expertise in JavaScript, CSS, and React.js** to contribute to a company's mission and growth.

## PROFESSIONAL SUMMARY

- Experienced Software Developer with 5 years of expertise** in web development, currently serving as an Associate Consultant at Infosys Ltd, specializing in React.js, Typescript, and modern front-end technologies.
- Proven expertise in **optimizing web applications**, delivering high-quality, zero-defect code with strong client satisfaction.
- Skilled in **agile development methodologies**, actively participating in sprint planning and daily stand-ups to collaborate with cross-functional teams and deliver high-quality software solutions in fast-paced environments.
- Advanced problem-solving capabilities, having a strong track record in **troubleshooting complex application issues**, ensuring high system functionality and smooth integration of APIs and third-party services.
- Hands-on experience in front-end and back-end technologies, contributing significantly to **full-stack development** using React.js, Java, .Net, Angular, SQL and various database systems, delivering seamless user experiences.
- Strong communication and collaboration skills, adept at working in diverse team environments, and capable of translating technical concepts to clients and stakeholders for successful project outcomes.

## WORK EXPERIENCE

**Associate Consultant | Infosys Ltd, Pune, India | Nov'2022 –Present**

**Client: Verizon**

- Leading the development and optimization of high-performance web applications with **React.js, Typescript, and Redux Toolkit**, ensuring the implementation of scalable, maintainable, and high-quality code.
- Developing RESTful APIs across multiple **microservice solutions using .Net framework and C# language** to call internal and external APIs, handle data and apply business logic.
- Played a key role in enhancing and maintaining complex web applications by addressing legacy issues and implementing modern, responsive designs.
- Implementing advanced state management solutions with Redux Toolkit, simplifying complex application states and improving data flow for seamless performance.
- Applying **Continuous Integration and Continuous deployment (CI/CD) practices** to streamline code integration and deployment, promoting best development practices across cross-functional teams.
- Integrating and **deploying code daily through the project pipeline**, utilizing GitLab for continuous integration and seamless project delivery.
- Tracking and managing tasks using Jira for effective project collaboration and progress monitoring.

## PROJECTS

### US Digital Registration and Servicing (12/2020-10/2022) - Capgemini

Redesigning old Registration portal to ask minimal information and adding MFA to authenticate the user. Redesigning the Dashboard and preferences selection page after user logs into the application.

- Creation of UI pages based on dynamic data using React.js and redux for state management
- Developed REST APIs with Spring Boot microservice for handling complex business logic and integration with AEM for fetching dynamic data and returning to UI.
- CI/CD Pipeline and creation of Test cases for Spring Boot microservices using Junit

### Snow Redesign and FIOS Expansion (11/2022-Present) - Infosys

Redesigning the UI for ticket creation and reporting potential account issues to the Agent. Also developed a Timeline to show all kinds of interactions on customer's account.

- Developed React.js web application and integrated with existing Angular container App. Integration of external chatbot to facilitate ticket creation.
- Developed REST APIs in .NET solution with C# language. The backend integrated to a SQL Server DB for saving session details as well as API tokens which was cached across multiple sessions.

Senior Software Engineer | Capgemini, India | Sept'2020 – Nov' 2022

Client: MetLife US, MetLife Mexico

- Developed an **ADA-compliant React.js** web application to manage and update user profiles for a major insurance provider in the US & Mexico.
- Migrated legacy applications to **Java, Spring Boot and React.js**, improving system performance and maintainability.
- Facilitated sprint meetings, removed blockers, and ensured smooth agile workflows.
- Key Achievement: Successfully modernized applications, improving response times by up to 30%.
- Engaged in Continuous Integration and Continuous Deployment (CI/CD) practices to ensure high-quality code and streamlined delivery.
